CSC 1100 ELEMENTS OF PROGRAMMING

SEMESTER 1, 2017/2018

SECTION 4

GUESSING GAME : MASTERMIND

GROUP NAME : IBN AL-NAFIS

PREPARED BY:

NAME	MATRIC NO.
Ahmad Zaidan bin Adnan	1718733
Muhammad Salikin bin Ismail	1711083
Mohd. Syafiq Asyraf bin Samsudin	1715447
Mohamad Zaki bin Jaafar	1719207

LECTURER

MDM. SURIANI BINTI SULAIMAN

DUE

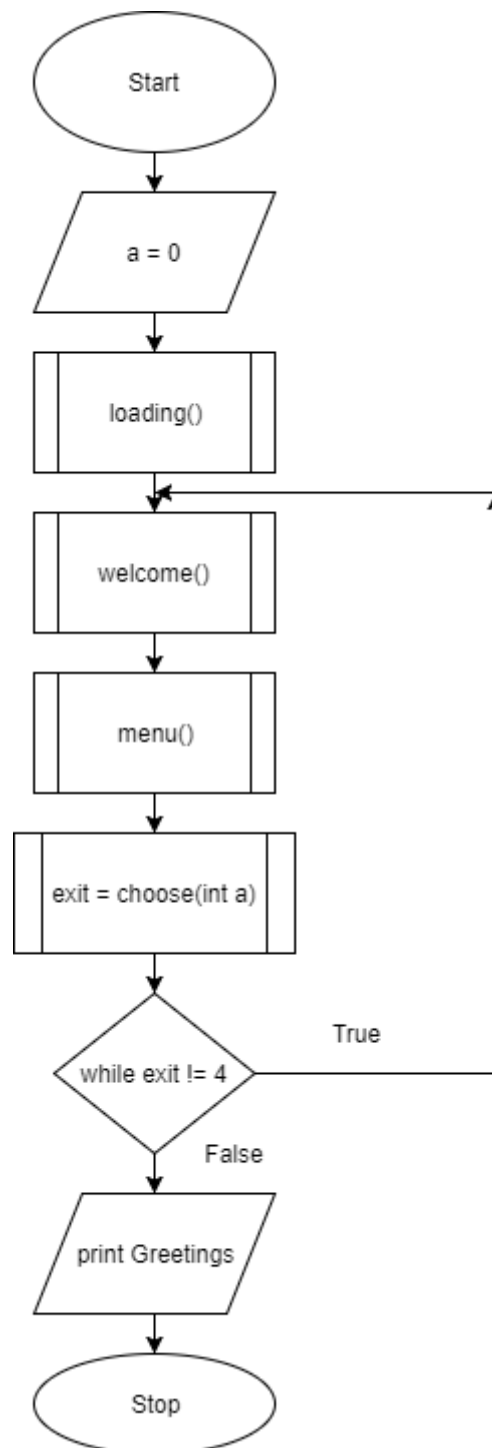

25 DECEMBER 2017

INTRODUCTION

The project that we had done is developing a program that brings the board game Mastermind into an interactive program on the computer. The program developed is called Guessing Game: Mastermind. The only difference between the original board game and the program is the board game requires two players who are the code maker and the code breaker while the program only requires a code breaker because the code is designed by the program itself. Basically the game gives the player ten turns to guess the four correct colours ordered by the program. Moreover, the program gives hints to the player during the game. The hints are the number of correct colours in the right position and the number of correct colours in the wrong position. In order to win the game, the player must guess the correct colours in the correct positions for ten tries or less. The score for the player is calculated referring to the number of turns used.

FLOWCHART OF THE PROGRAM

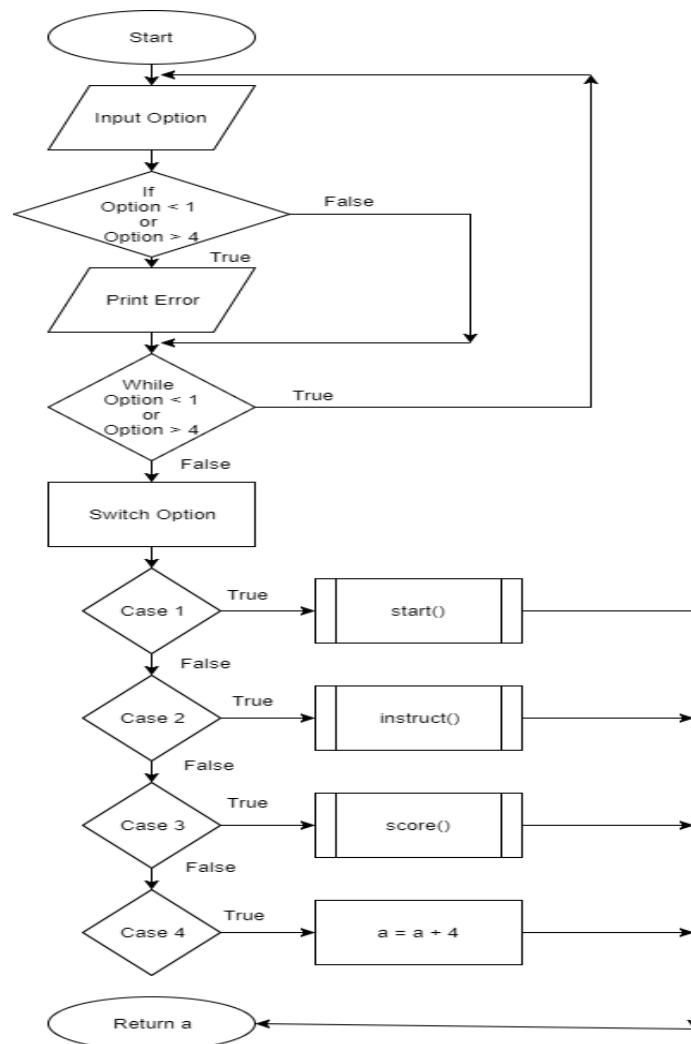

main()

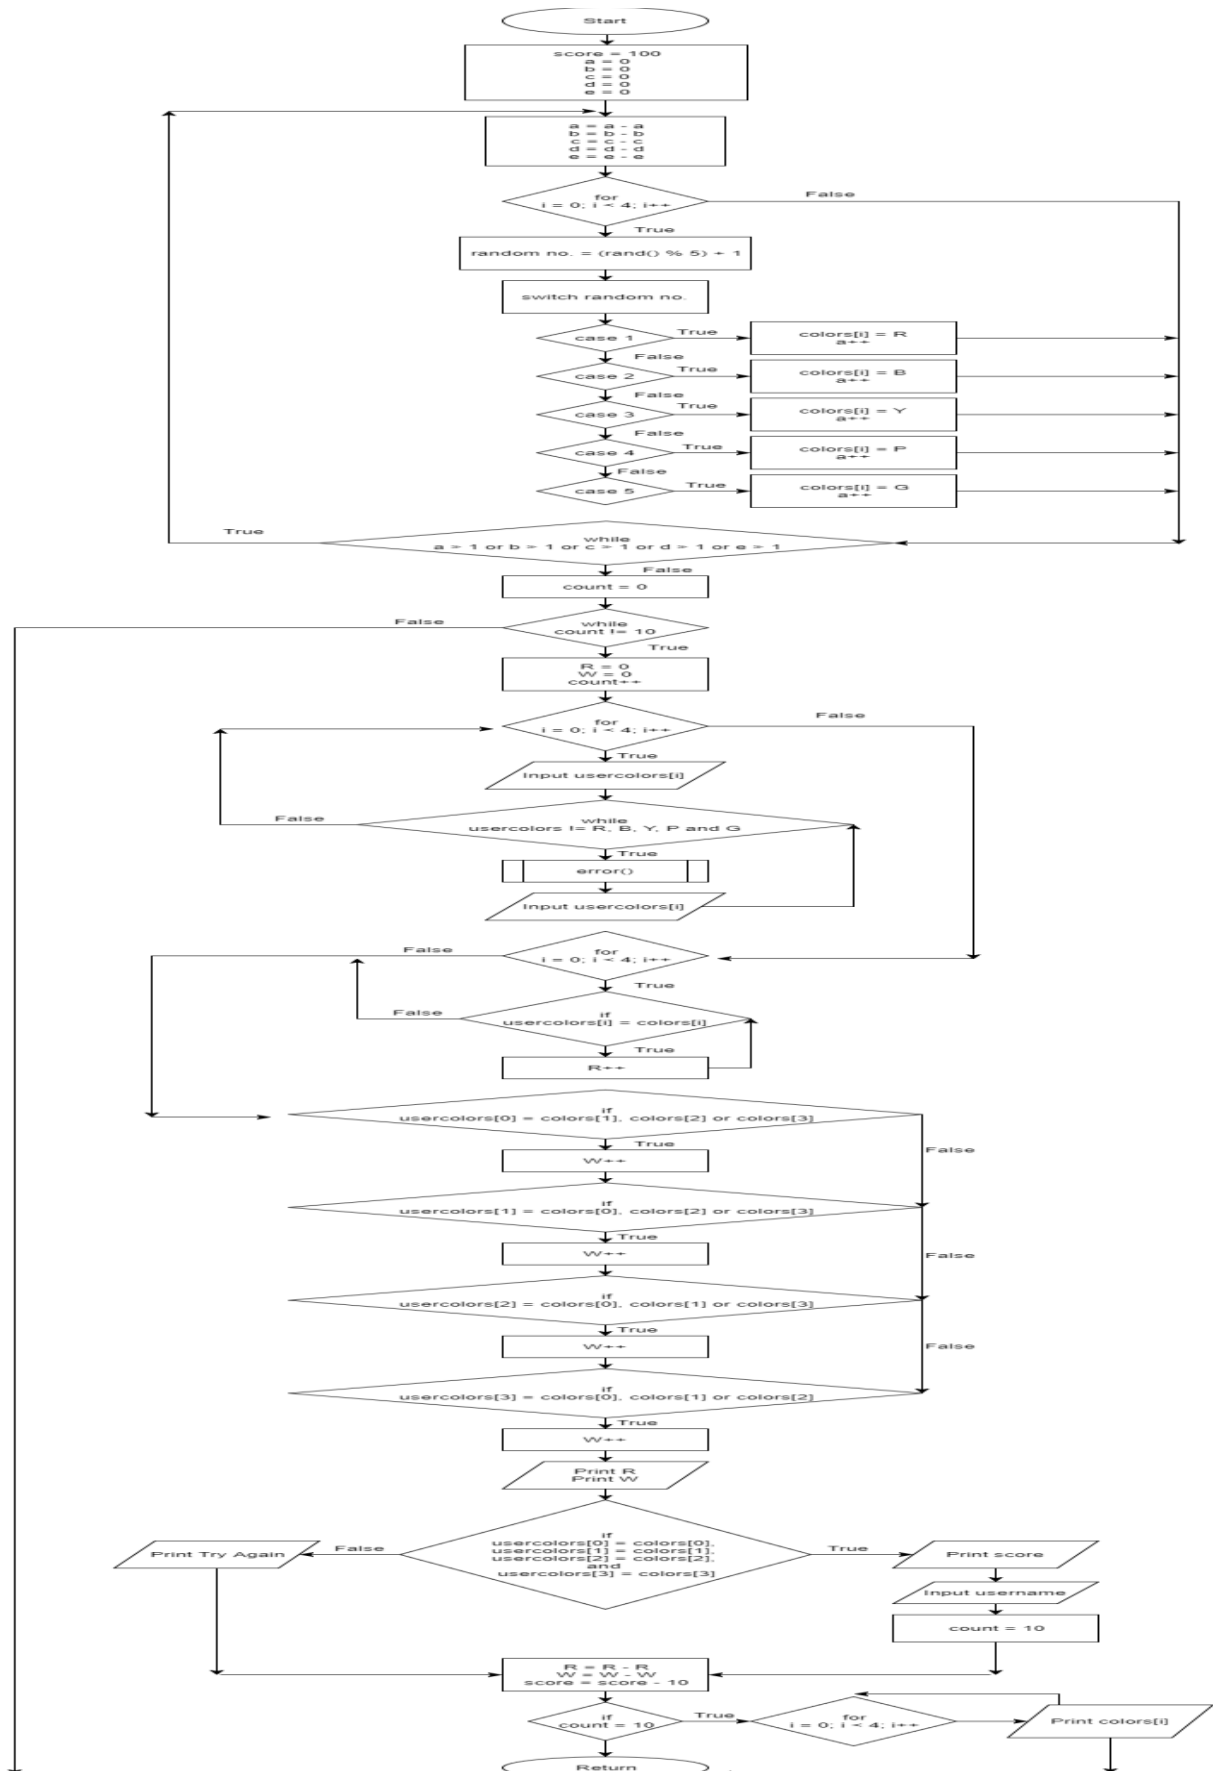

menu()

choose()

start()

error()

instruct()

score()

LIST OF FUNCTIONS

1. `main()`

This function calls the important functions in the program.

2. `loading()`

This function shows the loading bar of the program.

3. `welcome()`

This function shows the title of the game which is Mastermind.

4. `menu()`

This function shows all the options in the main menu.

5. `choose()`

This function lets the user choose the options in the main menu before.

6. `start()`

This function starts the game which is the main purpose of the program.

7. `error()`

This function prints the error message when the user enters the wrong inputs.

8. `instruct()`

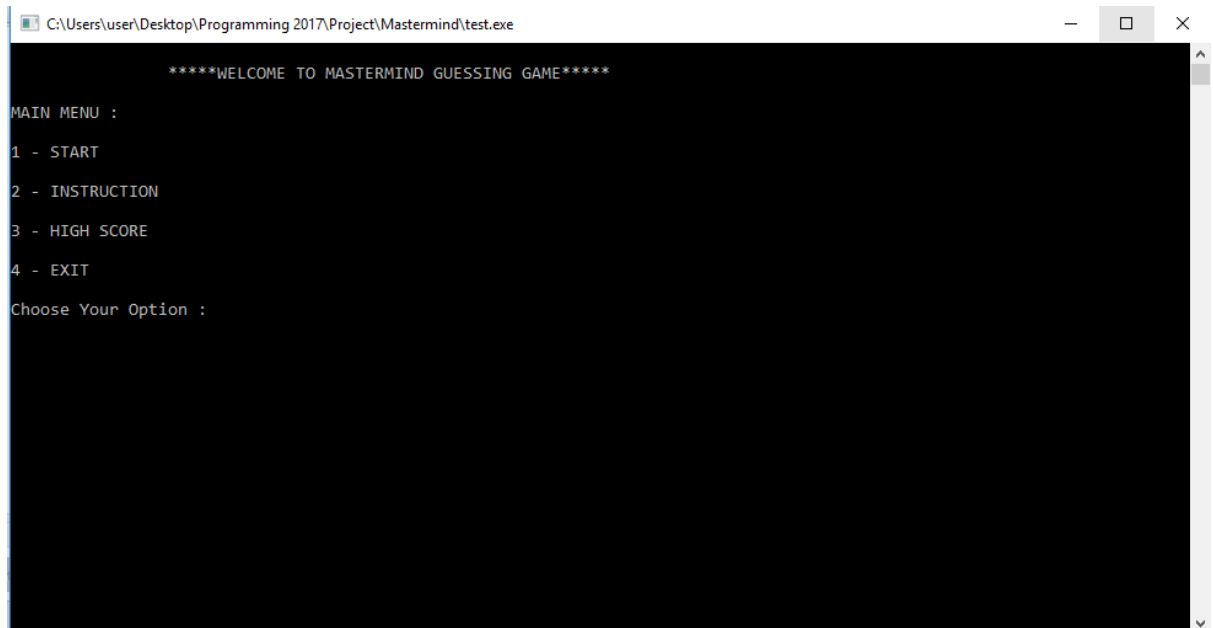

This function shows the instructions of the game.

9. `score()`

This function shows the high scores of the players in the game.

SCREENSHOTS OF THE PROGRAM

1. Main Menu

A screenshot of a Windows application window titled "C:\Users\user\Desktop\Programming 2017\Project\Mastermind\test.exe". The window has a black background with white text. At the top, it says "*****WELCOME TO MASTERMIND GUESSING GAME*****". Below that, it says "MAIN MENU :". Then, it lists four options: "1 - START", "2 - INSTRUCTION", "3 - HIGH SCORE", and "4 - EXIT". At the bottom, it says "Choose Your Option :".

```
C:\Users\user\Desktop\Programming 2017\Project\Mastermind\test.exe

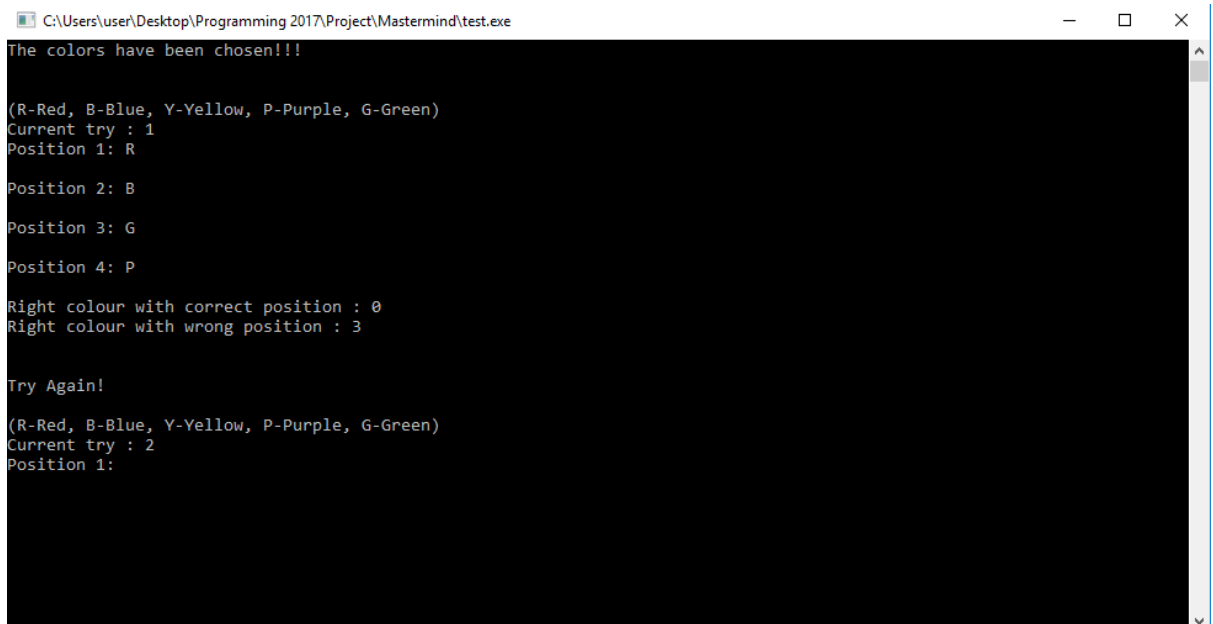

*****WELCOME TO MASTERMIND GUESSING GAME*****

MAIN MENU :

1 - START
2 - INSTRUCTION
3 - HIGH SCORE
4 - EXIT

Choose Your Option :
```

2. The game

A screenshot of the same Windows application window, now showing the game play area. It says "The colors have been chosen!!!". Below that, it lists the color key: "(R-Red, B-Blue, Y-Yellow, P-Purple, G-Green)". Then, it shows the current try: "Current try : 1". It then prompts for positions: "Position 1: R", "Position 2: B", "Position 3: G", and "Position 4: P". Below that, it shows the results: "Right colour with correct position : 0" and "Right colour with wrong position : 3". It then says "Try Again!". Finally, it shows the next try: "Current try : 2" and "Position 1:".

```
C:\Users\user\Desktop\Programming 2017\Project\Mastermind\test.exe

The colors have been chosen!!!

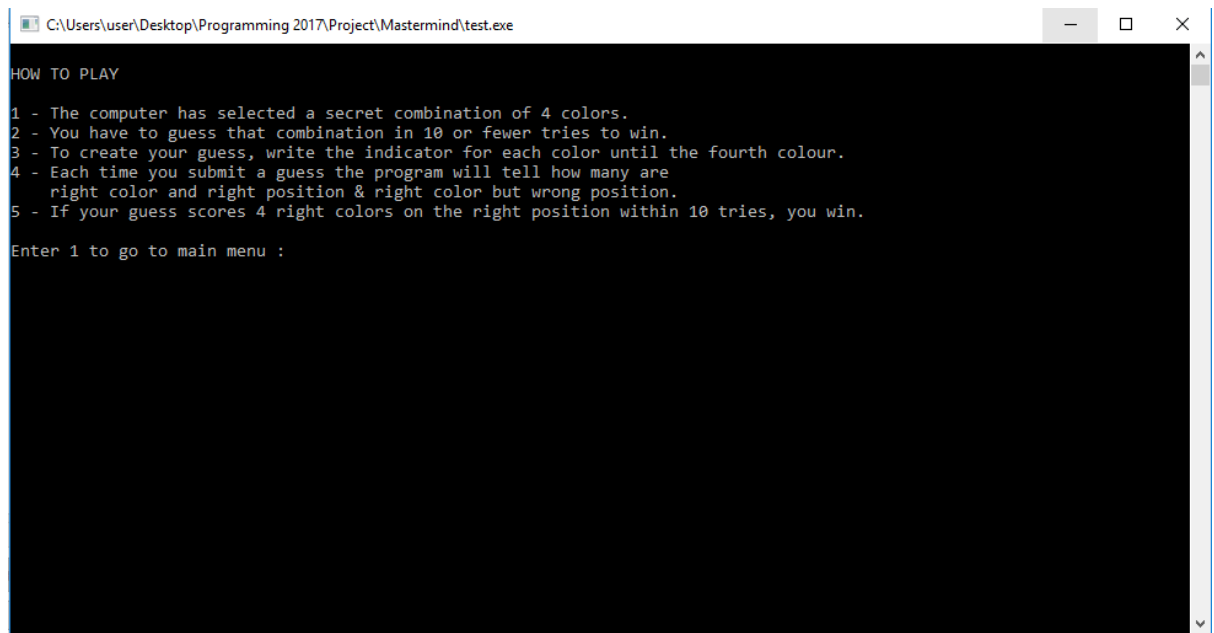

(R-Red, B-Blue, Y-Yellow, P-Purple, G-Green)
Current try : 1
Position 1: R
Position 2: B
Position 3: G
Position 4: P

Right colour with correct position : 0
Right colour with wrong position : 3

Try Again!

(R-Red, B-Blue, Y-Yellow, P-Purple, G-Green)
Current try : 2
Position 1:
```

3. Instruction of the game

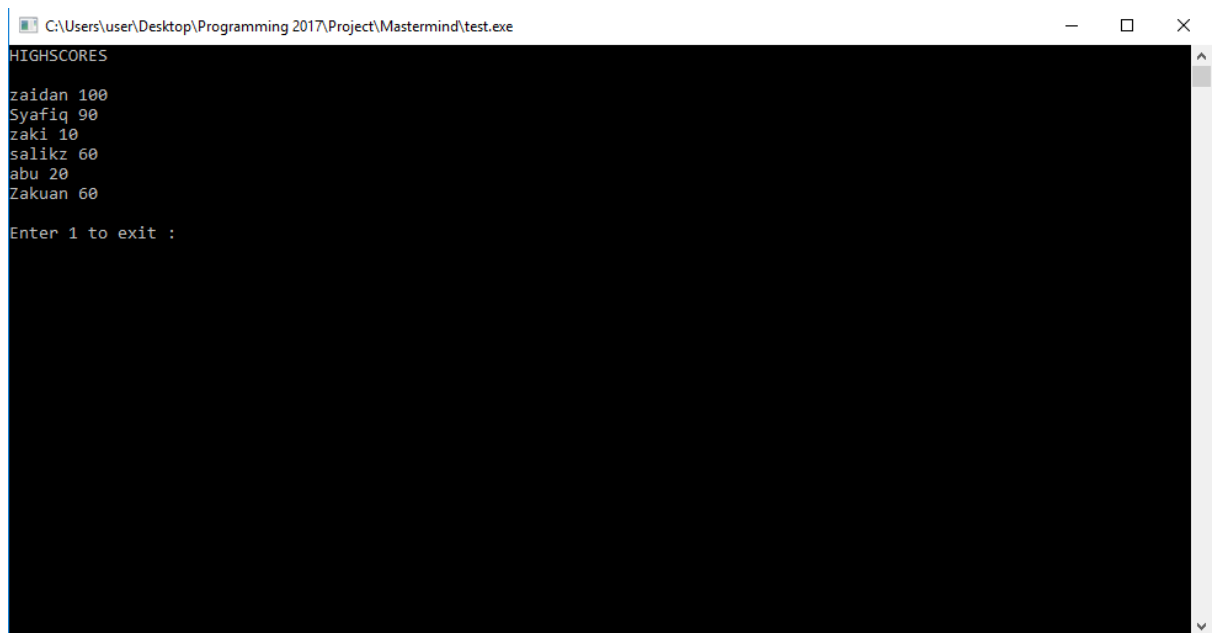

```
C:\Users\user\Desktop\Programming 2017\Project\Mastermind\test.exe

HOW TO PLAY

1 - The computer has selected a secret combination of 4 colors.
2 - You have to guess that combination in 10 or fewer tries to win.
3 - To create your guess, write the indicator for each color until the fourth colour.
4 - Each time you submit a guess the program will tell how many are
   right color and right position & right color but wrong position.
5 - If your guess scores 4 right colors on the right position within 10 tries, you win.

Enter 1 to go to main menu :
```

4. High scores of the game

```
C:\Users\user\Desktop\Programming 2017\Project\Mastermind\test.exe

HIGHSCORES

zaidan 100
Syafiq 90
zaki 10
salikz 60
abu 20
Zakuan 60

Enter 1 to exit :
